SUMMARY

Master's student in Climate Science and Policy with a Bachelor's degree in geography, which was academically grounded in climate science and sustainability. Engagement with climate and sustainability conferences inspired a growing interest in climate solutions and policy development. Experienced in research, data interpretation, and field-based environmental studies. Motivated to apply geo-spatial tools to support climate change studies and sustainability planning.

EDUCATION

Teri School Of Advanced Studies <i>M.Sc. Climate Science And Policy</i>	2025 - 2027 Delhi
University of Delhi <i>B.A Geography</i>	2022 - 2025 Delhi

CERTIFICATIONS

Soil testing	February 2025
– Completed a 15-day certificate course in Soil Testing and Water Analysis from the University of Delhi, gaining hands-on experience in assessing soil parameters, pH levels, and water quality to support sustainable agricultural practices.	
Satellite Image Processing	April 2024
– Undertook a 15-day certification in Satellite Image Processing at the University of Delhi, applying QGIS and ArcGIS tools for spatial data processing, thematic mapping, satellite image interpretation, and spatial dataset visualization.	

EXTRACURRICULAR AND PROJECTS

Tata Consultancy Services ESG Job Simulation	March 2026
– Explored a multi-task sustainability consulting simulation (4+ modules) for Tata Consultancy Services, analysing corporate sustainability challenges and developing a fitment matrix with strategic ESG solutions.	
BCG's Climate and Sustainability Job Simulation	March 2026
– Conducted carbon emissions baseline analysis using Excel, evaluating datasets and comparing Scope 1, 2, and 3 emissions data with the CDP database to improve data reliability and benchmarking accuracy.	
World Sustainable Development Summit - TERI	March 2026
– Volunteered at the World Sustainable Development Summit, supporting 3 days of sessions and stakeholder engagement involving international policymakers, sustainability experts, and climate researchers.	
Climate skills workshop - TERI	October 2025
– Participated in hands-on training, group exercises, and interactive sessions focused on climate change, sustainability practices, and community-driven solutions with over 130 students.	
International Conference - University Of Delhi	April 2025
– Assisted in coordinating an academic conference involving 100+ researchers, faculty members, and scholars, contributing to discussions on geospatial innovations for environmental sustainability and climate resilience.	
Academic work	2024 - 2025
– Critiqued a field-based study on sustainable tourism in Goa, surveying 100+ tourists to analyse socio-economic characteristics and behavioural patterns, assessing tourism's environmental and community-level impacts.	
– Conducted a disaster management research project assessing flood vulnerability and preparedness across 4–5 key risk indicators in Delhi, by analysing gaps in flood management systems, community awareness and evacuation planning.	

SKILLS

- Effective communication
- Research Design
- GIS and Spatial Data Analysis
- Disaster Risk Assessment
- Environmental Impact Analysis
